go beyond the far the guidance contained in the almost 2000 pages of the federal acquisition regulation and the various agency supplements are just a part of the resources government acquisition professionals need to do their jobs effectively accessing and understanding case law is equally important to a thorough understanding of government contracting legal decisions explain the government accountability office s and the courts views on how procurement statutes and regulations apply in a wide range of situations case law also gives potential bid protesters and agencies a way to gauge the likely outcome of a protest until now it has been difficult to find and understand the legal decisions that could be relevant to a particular situation key case law rules for government contract formation changes that by organizing and explaining the most important protest grounds in a readily
accessible and comprehensible way with an emphasis on more recent cases the book is organized around the key protest grounds such as pricing issues allegations that the government wrongfully prevented competition or improper sealed bidding procedures bridging the gap of understanding between the legal and the contracting communities this book is a much needed addition to the essential resources for acquisition professionals

Statement of Disbursements of the House 2014-09

over the past decade america’s military and federal civilian employees as well as contractors have performed vital and dangerous tasks in iraq and afghanistan contractors support however has been unnecessarily costly and has been plagued by high levels of waste and fraud the united states will not be able to conduct large or sustained contingency operations without heavy contractor support avoiding a repetition of the waste fraud and abuse seen in iraq and afghanistan requires either a great increase in agencies ability to perform core tasks and to manage contracts effectively or a disciplined reconsideration of plans and commitments that would require intense use of contractors failure by congress and the executive branch to heed a decade’s lessons on contingency contracting from iraq and afghanistan will not avert new contingencies it will only ensure that additional billions of dollars of waste will occur and that u s objectives and standing in the world will suffer worse still lives will be lost because of waste and mismanagement

Key Case Law Rules for Government Contract Formation 2011-04-05

offers state of the art principles and strategies gleaned from high profile projects to help readers manage design this guide to managing design process within the commercial design and construction industry addresses a growing pain point in an industry where collaborative approaches to project delivery are outpacing the way professionals work it synthesizes issues by investigating the why how and who of the discipline of managing design and gives the what and when to apply the solutions given various project delivery and contracting methods the book features candid interviews with over 40 industry leaders architects engineers contractors owners educators technology evangelists and authors which present a broad look at current issues and offer
Paths to future collaboration and change managing design conversations project controls and best practices for commercial design and construction projects is a self help book for design and construction that provides an insider's look at the mysteries of managing design for yourself team firm and future it tackles client empathy firm culture owner leadership design and budgets dealing with engineers consultants and contractors contracts team assembly and much more features eye opening interviews with 40 industry luminaries exposes issues and poses solutions to longstanding industry ills offers a project design controls framework and toolset for immediate application and action includes best practice tips process diagrams and comparative analytical tables to support the text written in a relatable style managing design conversations project controls and best practices for commercial design and construction projects is a welcome resource for owners contractors and designers in search of better ways to work together managing design blends practical advice from the author's five decades in architecture and construction with wisdom from more than three dozen luminaries in the design delivery ownership and operation of the built environment the result is an extraordinary guide to integrating practice across disciplines bob fisher editor in chief design intelligence managing design peers into the soul of a contentious industry as it grapples with change a deep dive into the design and construction process in the words of those doing the work i enjoyed the engineers and contractors pleas to be made parties to design process early on the questions as interesting as the answers are both here in this book richard korman deputy editor engineering news record managing design hits many of the design and construction industry's ills head on with insightful interviews by new and established leaders and real world tactics on creating better teams better communications between players and most vitally better project results rebecca w e edmunds aia editor author and president r4 llc

Washington River Protection Solutions LLC WRPS has faced significant project management challenges in managing Davis Bacon construction work that meets contractually required small business goals. The unique challenge is to provide contracting opportunities to multiple small business construction subcontractors while performing high hazard work in a safe and productive manner. Previous to the Washington River Protection Solutions LLC contract, construction work at the Hanford tank farms was contracted to large companies while current Department of Energy DOE contracts typically emphasize small business awards as an integral part of nuclear project management. At Hanford tank farms construction involves removal of old equipment and structures and installation of new infrastructure to support waste retrieval and waste feed delivery to the waste treatment plant. Utilizing the optimum construction approach ensures that the contractors responsible for this work are successful in meeting safety, quality, cost, and schedule objectives while working in a very hazardous environment. This paper describes the successful transition from a traditional project delivery method that utilized a large business general contractor and subcontractors to a new project construction management model that is more oriented to small businesses. Construction has selected the agency construction management method. This method was implemented in the first quarter of fiscal year FY 2009 where construction management is performed by substantially home office resources from the URS Northwest office in Richland, Washington. The agency method has allowed WRPS to provide proven construction managers and field
leads to mentor and direct small business contractors thus providing expertise and assurance of a successful project construction execution contracts are subcontracted directly by wrps to small or disadvantaged contractors that are mentored and supported by drs personnel each small contractor is mentored and supported utilizing the principles of the construction industry institute cii partnering process some of the key mentoring and partnering areas that are explored in this paper are internal and external safety professional support subcontractor safety teams and the interface with project and site safety teams quality assurance program support to facilitate compliance with nqa 1 construction team roles and responsibilities work definition for successful fixed price contracts scheduling and interface with project schedules and cost projection accruals the practical application of the cii partnering principles with the construction management expertise of urs has led to a highly successful construction model that also meets small business contracting goals
