the computer revolution over the past 10-15 years in our country has feed to the permanent dependence of all fields of human activity on computer
technology based on my experience as a plan examines for all building documentations i find that is necessary a reform and improvement of the plan
examination and approval process in all boroughs of this big city of n y because the architects and engineers have the best knowledge of their
documentations i have realized that their help is the most necessary to the real improvement of the verification process we have to help them in this
hypothesis i considered necessary to create a data base of guidelines realized for different building types which will be a computerized flexible tool for all
review and approved process which can be updated all the time in the future by adding new guidelines to the existing ones with the new and specific
requirements regarding new zoning resolutions new code articles new memorandums and criteria s issued by the city department for the best development
of this great city this was the fundamental idea for the creation a data base of guidelines which will help from the beginning of the process of creation of
technical documentations and after in the long process of verification and approval for the execution of buildings in the city certainly this collection of
guidelines proposed in my 2 volumes does not include all of the possible building types zoning and code resolutions but in my opinion and based on my
experience is the most important tool in this complex process of approval of new investments this tool can be used not only by designers of the
documentations but by the expediters plan examiners contractors and finally by the owners of the investments these two books will be a unified procedure
for all the factors which contribute to the realization of investments i consider to mention and other benefits realized by this written data base a reduced
work load in the department of building a uniform approach for all 5 boroughs in the verification and approval process a reduction of time for verification
and approval an improvement in the quality of documentations presented for verification and approval the use of self certification will be increased by the
confidence of designers for their documentations a remarkable reduction of people involved in this complex process a sensible reduction of the investment
costs the thoroughly revised updated 3rd edition of the book samanya gyan capsule 2019 offers a variety of information on various subjects in a very
precise crisp format the various subjects included are history geography polity economy general science ecology environment computers miscellaneous
indian panorama etc a special section has also been provided on current affairs containing the coverage of latest events issues ideas people the
highlighting feature of the book is the collection of the most relevant information and latest authentic data useful for all your needs the content has been
made engaging with the use of charts graphics and tables this open access book is a collection of accepted papers from the 8th international conference on
civil engineering icce2021 researchers and engineers have discussed and presented around three major topics i e construction and structural mechanics
building materials and transportation and traffic the content provide new ideas and practical experiences for both scientists and professionals the computer
recognition systems are nowadays one of the most promising directions in artificial intelligence this book is the most comprehensive study of this field it
contains a collection of 86 carefully selected articles contributed by experts of pattern recognition it reports on current research with respect to both
methodology and applications in particular it includes the following sections biometrics data stream classification and big data analytics features learning
and classifiers image processing and computer vision medical applications miscellaneous applications pattern recognition and image processing in robotics
speech and word recognition this book is a great reference tool for scientists who deal with the problems of designing computer pattern recognition
systems its target readers can be the as well researchers as students of computer science artificial intelligence or robotics at the 8th european congress of
neurosurgery which took place in barcelona september 6 11 1987 a great number of papers from all fields of neurosurgery were presented reflecting the
major advances that have been achieved in recent years the programme committee of the european association of neurosurgical societies has selected the
highlights of the congress for publication these contributions were carefully edited and compiled in two supplement volumes of acta neurochirurgica ten
hours after the attack on pearl harbor another pearl harbor of even more devastating consequence for american arms occurred in the philippines 4 500
miles to the west on december 8 1941 at 12 35 p m 196 japanese navy bombers and fighters crippled the largest force of b 17 four engine bombers outside
the united states and also decimated their protective p 40 interceptors the sudden blow allowed the japanese to rule the skies over the philippines
removing the only effective barrier that stood between them and their conquest of southeast asia this event has been called one of the blackest days in
life at the bottom the worldview that makes the underclass
American military history: How could the army commander in the Philippines, the renowned Lt. Gen. Douglas MacArthur, have been caught with all his planes on the ground when he had been alerted in the small hours of that morning of the Pearl Harbor attack and warned of the likelihood of a Japanese strike on his forces? In this book, author William H. Bartsch attempts to answer this and other related questions. Bartsch draws upon twenty-five years of research into American and Japanese records and interviews with many of the participants themselves, particularly survivors of the actual attack on Clark and Iba Air Bases. The dramatic and detailed coverage of the attack is preceded by an account of the hurried American build up of air power in the Philippines after July 1941 and of Japanese planning and preparations for this opening assault of its southern operations. Bartsch juxtaposes the experiences of staff of the U.S. War Department in Washington and its Far East Air Force bomber fighter and radar personnel in the Philippines who were affected by its decisions with those of Japan's Imperial General Headquarters in Tokyo and the 11th Air Fleet staff and pilots on Formosa who were assigned the responsibility for carrying out the attack on the Philippines five hundred miles to the south in order to put the December 8th attack in broader context. Bartsch details micro level personal experiences and presents the political and strategic aspects of American and Japanese planning for a war in the Pacific. Despite the significance of this subject matter, it has never before been given full book length treatment. This book represents the culmination of decades long efforts of the author to fill this historical gap. Focuses on federal agency competition with private industry. Pt. 3 contains a continuation of hearings on commercial and industrial activities by military departments. Appendix includes GAO study of alcoholic beverage sales on military posts. Pt. 4 contains a continuation of hearings on government competition with private defense industries. Third edition of this book is thoroughly revised and updated in accordance with the syllabus of anatomy recommended by the medical council of India. It covers in detail the anatomy of upper limb and thorax. The anatomy of heart and lungs is related clinically in depth. Following recent trends of anatomy education, the book in addition to basic information provides knowledge on anatomical embryological histological genetic basis of common clinical problems through its features clinical correlation and clinical case study. Written in simple and easy to understand language, this profusely illustrated book provides the knowledge of anatomy without extraneous details. The specific learning objectives have been given in the beginning of each chapter to facilitate self-learning by the students ideal for UG medical and dental students. NEET PG entrance examinations USMLE PLAB FMGE etc. thorough revision of all the chapters detailed exposition on joints and nerves of the upper limb, surgical anatomy of heart, lungs, trachea and oesophagus clinical correlations. Integrated in the text. Highlighting clinical application of anatomical facts have been updated extensively. Golden facts to remember at the end of each chapter highlight the salient and important points for the purpose of Viva Voce and competitive exams. Clinical case study at the end of each chapter to initiate interest of students in problem based learning. Additional information of higher academic value presented in a simple way in an effort to inculcate interest among readers especially postgraduates. Important facts useful for candidates appearing in various entrance examinations like PGME USMLE PLAB listed under golden facts to remember multiple choice questions at the end of the book for self-assessment of the topics studied. Core competencies prescribed by the MCI are covered and competency codes are included in the text. Core competencies prescribed by the MCI are covered and competency codes are included in the text. Proceedings of the 8th International Symposium on Heating, Ventilation, and Air Conditioning, held in Xi'an, China in October 2013. The conference series was initiated at Tsinghua University in 1991 and has since become the premier international HVAC conference initiated in China, playing a significant part in the development of HVAC and indoor environmental research and Industry around the world. This International Conference provided an exclusive opportunity for policy makers, designers, researchers, engineers, and managers to share their experience considering the recent attention on building energy consumption and indoor environments. ISHVAC2013 provided a global platform for discussing recent research on and developments in different aspects of HVAC systems and components with a focus on building energy consumption and efficiency, and indoor environments. These categories span a broad range of topics and the proceedings provide readers with a good general overview of recent advances in different aspects of HVAC systems and related research. As such, they offer a unique resource for further research and a valuable source of information for those interested in the subject. The proceedings are intended for researchers, engineers, and graduate students in the fields of heating ventilation and air conditioning, HVAC, indoor environments, energy systems, and building information and management.
from 15 submissions the papers address a broad range of topics in applications of information technology to biomedical engineering and medical informatics the tactics and technologies of modern air assault vertical deployment of troops by helicopter or similar means emerged properly during the 1950s in korea and algeria yet it was during the vietnam war that helicopter air assault truly came of age and by 1965 the united states had established fully airmobile battalions brigades and divisions including the 1st cavalry division airmobile this division brought to vietnam a revolutionary new speed and dexterity in battlefield tactics using massed helicopters to liberate its soldiers from traditional overland methods of combat manoeuvre however the communist troops adjusted their own thinking to handle airmobile assaults specializing in ambush harassment infiltration attacks and small scale attrition the north vietnamese operated with light logistics and a deep familiarity with the terrain they optimized their defensive tactics to make landing zones as hostile as possible for assaulting us troops and from 1966 worked to draw them into hill traps extensive kill zones specially prepared for defence in depth by the time the 1st cavalry division airmobile withdrew from vietnam in 1972 it had suffered more casualties than any other us army division featuring specially commissioned artwork archive photographs and full colour battle maps this study charts the evolution of us airmobile tactics pitted against north vietnamese countermeasures the two sides are analysed in detail including training logistics weaponry and organization during the vietnam war both the united states and the soviet union supplied all manner of weapon systems to the opposing sides including tanks and armoured vehicles two tanks in particular took momentary prominence in the later years of the conflict on the south vietnamese side it was the us m41 walker bulldog for the communist north vietnamese the soviet supplied t 54 main battle tank was the core of their armoured power in their first major engagement during operation lam son 719 february march 1971 it was the walker bulldog in the ascendant but in later battles the t 54s inflicted heavy losses on their lighter opponents taking the advantage through their superior manoeuvrability and gunnery illustrated with full colour artwork as well as rare and revealing photographs from both sides this book studies these two iconic tanks in vietnamese service examining how their differing designs and fighting doctrines affected their performance in this unique theatre of combat the thoroughly revised updated 2nd edition of the book comprehensive guide for ipm iim indore entrance exam with 5 online tests has been prepared on the exact syllabus pattern of the latest exam notification the book provides complete theory along with solved examples practice exercises the previous papers of 2017 onwards are included in the respective chapters in the exercise part the book is divided into 2 parts verbal ability logical reasoning english language and quantitative aptitude quantitative aptitude data interpretation which are further divided into 4 sections the solution to exercises are provided at the end of the book the access to the 5 online tests is provided in the book human impact on natural landscapes through urbanization and agricultural expansion are becoming more and more dramatic and are the cause of serious environmental problems this volume examines the effect of landscape disturbance on plant and animal diversity in the five mediterranean climate regions of the world it begins with three introductory chapters broadly reviewing the issues of landscape degradation further contributions describe regional land use conflicts in each of the five regions landscape disturbance and plant diversity and landscape disturbance and animal diversity are treated in separate chapters four contributions deal with demography and ecosyphiology in vegetation succession following disturbance the volume closes with a consideration of the future addressing aspects of environmental politics for lovers of natural history this is the first book to explore allan riverstone mcculloch s scientific genius artistic talents and his crucial role in the development of the australian museum allan riverstone mcculloch 1885 1925 was a leading scientist and talented illustrator the australian museum s most senior curator and its star exhibition designer so why has history ignored his many contributions a free spirit and an expert on australian s fish species mcculloch was happiest collecting specimens on field trips to the great barrier reef lord howe island and beyond he escaped office politics at the museum to accompany cinematographer frank hurley on an expedition to tropical papua in 1922 but controversy erupted when officials accused them of stealing sacred artefacts the trip also left mcculloch with dysentery and malaria and his mental health declined in the naturalist brendan atkins explores mcculloch s scientific genius and artistic talents and his crucial role in the development of the australian museum it s a revealing and unflinching look at the remarkable life of a brilliant yet troubled scientist an artist a pioneering biologist and someone who helped make our cherished australian museum one of the greatest in the world at last his enthralling story is being told robyn williams brendan atkins book is a labour of love a meticulously researched account of the life of allan mcculloch a senior and controversial figure at sydney s australian museum and one of the world s leading ichthyologists or fish biologists it chronicles his field work adventures across the pacific and informs us about a myriad of topics along the way from taxidermy and dioramas to the ongoing problem of museums and their often plundered objects mcculloch led a troubled life something this book describes
with honesty and insight he was also an accomplished artist studying under julian ashton the remarkable sketches and paintings of species reproduced here indicate his complete dedication to his craft ken gelder is co author of the colonial kangaroo hunt 2020 and a professor of english at the university of melbourne a fascinating biography of a fascinating man one who was a naturalist adventurer artist and a genius who found his greatest struggle was to deal with his own demons louis nowra a wonderful biography that takes us into the intricate and astonishing world of the natural history museum 100 years ago brendan atkins recovers an important curator the enigmatic and talented allan mcculloch with insight humour and sensitivity along the way he teases out distinctions between stealing and collecting guilt and hubris despair and genius cathy perkins author of the shelf life of zora cross this fascinating story of a talented naturalist and his unravelling is also a portrait of the colonial madness of museums and collecting delia falconer crafting communities explores the interface between craft communication networks and urbanization in viking age northern europe viking period towns were the hubs of cross cultural communication of their age and innovations in specialized crafts provide archaeologists with some of the best evidence for studying this communication the integrated results presented in these papers have been made possible through the sustained collaboration of a group of experts with complementary insights into individual crafts results emerge from recent scholarly advances in the study of artifacts and production first the application of new analytical techniques in artifact studies e g metallographic isotopic and biomolecular techniques and second the shifted in interpretative focus of medieval artifact studies from a concern with object function to considerations of processes of production and of the social agency of technology furthermore the introduction of social network theory and actor network theory has redirected attention toward the process of communication and highlighted the significance of material culture in the learning and transmission of cultural knowledge including technology the volume brings together leading uk and scandinavian archaeological specialists to explore crafted products and workshop assemblages from these towns in order to clarify how such long range communication worked in pre modern northern europe contributors assess the implications for our understanding of early towns and the long term societal change catalysed by them including the initial steps towards commercial economies results are analyzed in relation to social network theory social and economic history and models of communication setting an agenda for further research crafting communities provides a landmark statement on our knowledge of viking age craft and communication pratiyogita darpan monthly magazine is india s largest read general knowledge and current affairs magazine pratiyogita darpan english monthly magazine is known for quality content on general knowledge and current affairs topics ranging from national and international news issues personality development interviews of examination toppers articles write up on topics like career economy history public administration geography polity social environment scientific legal etc solved papers of various examinations essay and debate contest quiz and knowledge testing features are covered every month in this magazine whenever a student decides to prepare for any examination her his first and foremost curiosity arises about the type of questions that he she has to face this becomes more important in the context of competitive exams where there is a neck to neck race for this purpose we feel great pleasure to present this book before you we have made an attempt to provide all competitive exams reasoning chapter wise and type wise questions asked in various ssc banks etc exams from 1999 to 2020 along with their solutions features chapterwise and type wise collection of past ssc banks and other competitive exams question papers 1999 2020 each chapter divides the questions into different types type 1 type2 and type 3 solutions have been given with enough diagrams proper reasoning for better understanding students must attempt these questions immediately after they complete the chapter in their class school home during their preparation the theory of dynamic equations has many interesting applications in control theory mathematical economics mathematical biology engineering and technology in some cases there exists uncertainty ambiguity or vague factors in such problems and fuzzy theory and interval analysis are powerful tools for modeling these equations on time scales the aim of this book is to present a systematic account of recent developments describe the current state of the useful theory show the essential unity achieved in the theory fuzzy dynamic equations dynamic inclusions and optimal control problems on time scales and initiate several new extensions to other types of fuzzy dynamic systems and dynamic inclusions the material is presented in a highly readable mathematically solid format many practical problems are illustrated displaying a wide variety of solution techniques the book is primarily intended for senior undergraduate students and beginning graduate students of engineering and science courses students in mathematical and physical sciences will find many sections of direct relevance vols for 1963 include as pt 2 of the jan issue medical subject headings

The thoroughly revised updated 2nd edition of the book Comprehensive Guide for IPM IIM Indore Entrance Exam with 5 online tests has been prepared on the exact syllabus pattern of the latest exam notification. The book provides complete theory along with solved examples, practice exercises, the previous papers of 2017 onwards are included in the respective chapters. In the exercise part, the book is divided into 2 parts: verbal ability, logical reasoning, English language, and quantitative aptitude. Quantitative aptitude data interpretation, which are further divided into 4 sections: the solution to exercises are provided.

Human impact on natural landscapes through urbanization and agricultural expansion are becoming more and more dramatic and are the cause of serious environmental problems. This volume examines the effect of landscape disturbance on plant and animal diversity in the five Mediterranean climate regions of the world. It begins with three introductory chapters broadly reviewing the issues of landscape degradation. Further contributions describe regional land use conflicts in each of the five regions. Landscape disturbance and plant diversity and landscape disturbance and animal diversity are treated in separate chapters. Four contributions deal with demography and ecophysiology in vegetation succession following disturbance. The volume closes with a consideration of the future, addressing aspects of environmental politics.

Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning 1922

For lovers of natural history, this is the first book to explore Allan Riverstone McCulloch's scientific genius, artistic talents, and his crucial role in the development of the Australian Museum. Allan Riverstone McCulloch (1885-1925) was a leading scientist and talented illustrator. The Australian Museum's most senior curator and its star exhibition designer, he was a free spirit and an expert on Australia's fish species. McCulloch was happiest collecting specimens on field trips to the Great Barrier Reef, Lord Howe Island, and beyond. He escaped office politics at the museum to accompany cinematographer Frank Hurley on an expedition to tropical Papua in 1922. But controversy erupted when officials accused them of stealing sacred artefacts. The trip also left McCulloch with dysentery and malaria. His mental health declined in the naturalist Brendan Atkins explores McCulloch's scientific genius and artistic talents and his crucial role in the development of the Australian Museum. It's a revealing and unflinching look at the remarkable life of a brilliant yet troubled scientist. An artist, a pioneering biologist, and someone who helped make our cherished Australian Museum one of the greatest in the world, his enthralling story is being told.
