The book will focus on exploiting state of the art research in semantic web and web science the rapidly evolving world wide web has led to revolutionary changes in the whole of society the research and development of the semantic web covers a number of global standards of the web and cutting edge technologies such as linked data social semantic web semantic web search smart data integration semantic web mining and web scale computing these proceedings are from the 6th Chinese Semantics Symposium
this book has two purposes first to introduce the study of work and the workplace as a method for informing the
design of computer systems to be used at work we primarily focus on the predominant way in which the
organization of work has been approached within the field of human computer interaction hci which is from the
perspective of ethnomethodology we locate studies of work in hci within its intellectual antecedents and describe
paradigmatic examples and case studies second we hope to provide those who are intending to conduct the type of
fieldwork that studies of work and the workplace draw off with suggestions as to how they can go about their own
work of developing observations about the settings they encounter these suggestions take the form of a set of
maxims that we have found useful while conducting the studies we have been involved in we draw from our own
fieldwork notes in order to illustrate these maxims in addition we also offer some homilies about how to make
observations again these are ones we have found useful in our own work table of contents motivation overview a
paradigmatic case scientific foundations detailed description case study how to conduct ethnomethodological
studies of work making observations current status

in 1973 henry kissinger shared the nobel peace prize for the secret negotiations that led to the agreement on
ending the war and restoring peace in vietnam nixon famously declared the 1973 agreement to be peace with
honor america was disengaging yet south vietnam still stood to fight its own war kissinger promptly moved to seal
up his personal records of the negotiations arguing that they are private not government records and that he will
only allow them to be unsealed after his death no peace no honor deploys extraordinary documentary bombshells
including a complete north vietnamese account of the secret talks to blow the lid off the true story of the peace
process neither nixon and kissinger s critics nor their defenders have guessed at the full truth the entire peace
negotiation was a sham nixon did not plan to exit vietnam but he knew that in order to continue bombing without a
congressional cutoff he would need a fig leaf kissinger negotiated a deal that he and nixon expected the north to
violate ironically their long maintained spin on what happened next is partially true only watergate stopped america
from sending the bombers back in this revelatory book has many other surprises berman produces new evidence
that finally proves a long suspected connection between candidate nixon in 1968 and the south vietnamese
government he tells the full story of operation duck hook a large scale offensive planned by nixon as early as 1969
that would have widened the war even to the point of bombing civilian food supplies he reveals transcripts of
candidate george mcgovern s attempts to negotiate his own october surprise for 1972 and a seriocomic plan by the
xia to overthrow south vietnam s president thieu even as late as 1975 throughout with page turning dialogue
provided by official transcriptions and notes berman reveals the step by step betrayal of south vietnam that started
with a short circuited negotiations loop and ended with double talk false promises and outright abandonment
berman draws on hundreds of declassified documents including the notes of kissinger s aides phone taps of the
nixon campaign in 1968 and mcgovern s own transcripts of his negotiations with north vietnam he has been able to
double and triple check north vietnamese accounts against american notes of meetings as well as previously
released bits of the record he has interviewed many key players including high level south vietnamese officials this
definitive account forever and completely rewrites the final chapter of the vietnam war henry kissinger s nobel prize
was won at the cost of america s honor

this is the first volume of a unique collection that brings together the best english language problems created for
students competing in the computational linguistics olympiad these problems are representative of the diverse
areas presented in the competition and designed with three principles in mind to challenge the student analytically
without requiring any explicit knowledge or experience in linguistics or computer science to expose the student to
the different kinds of reasoning required when encountering a new phenomenon in a language both as a theoretical
and as an applied problem to foster the natural curiosity students have about the workings of their own
language as well as to introduce them to the beauty and structure of other languages to learn about the models
and techniques used by computers to understand human language aside from being a fun intellectual challenge the
olympiad mimics the skills used by researchers and scholars in the field of computational linguistics in an
increasingly global economy where businesses operate across borders and languages having a strong pool of
computational linguists is a competitive advantage and an important component to both security and growth in the
21st century this collection of problems is a wonderful general introduction to the field of linguistics through the
analytic problem solving technique a fantastic collection of problems for anyone who is curious about how human
language works these books take serious scientific questions and present them in a fun accessible way readers
exercise their logical thinking capabilities while learning about a wide range of human languages linguistic
phenomena and computational models kevin knight usc information sciences institute
