Europeans and Tahitians but until now comparatively little research has been conducted on the more elaborate second volume and none on the first. The Polynesian archipelagos grew into objects of discourse over the years and Wallis logs may very well be located at the heart of these evocative constructs. The translated accounts of voyages undertaken by foreign vessels abounded in an era when they encouraged not only competitive geopolitical initiatives but also commercial enterprises throughout Europe, resulting in a voluminous textual corpus. However, French merchant seaman Etienne Marchand's journal of his voyage round the world in 1790-1792 encompassing an important visit to the Marquesas archipelago during his first crossing of the Pacific remained unpublished until 2005 and has only now been made available in English. The second volume of this series comprises an annotated translation in English of this document.
