this monograph answers the rarely discussed questions of why complicated grammatical case phenomena exist in korean and what the connection is between the case forms and their functions the author argues that the case forms in korean reflect patterns of the human cognitive process while this approach may seem rather obvious to non linguists it is indeed a novel claim in contemporary linguistic theory in order to provide technical analyses of korean case phenomena such as multiple nominative accusative non nominative subject and adverbial case constructions this book adopts an independently established descriptive construct known as reference point in the framework of cognitive grammar the author demonstrates that the notion of reference point not only explains a substantially wider set of data but also leads to a more reasonable generalization the intended readership of this book are researchers who are interested in case phenomena irrespective of their theoretical orientation

this book is the first study to examine how interactional style develops within the walls of a
foreign language classroom in the first two years of language study results show learners to be
highly sensitive to pragmatic information and that learners can move toward an appropriate
interactional style through classroom interactive experience the book shows how learners are most
often sources who offer assistance and correction with errors serving most often to stimulate
further thinking about what form is correct analysis shows learners to be active in seeking
corrective information in the classroom setting not only from peer partners but also from the
teacher they are active in noticing how the teacher s utterances even when addressed to others
contrast with their own and utilize corrective feedback intended for other students in addition
the results show that teacher initiated corrective feedback addressed to individual learners is
only one source of corrective feedback learners are shown to be active in both teacher fronted
and peer interactive settings in newer l2 teaching methodologies which focus on the use of peer
interactive tasks the teacher s role has been de emphasized this book however shows how important
the teacher s role is the final chapter examines how the teacher can act to maximize the benefits
of peer interactive tasks through how they design tasks and present them to the class first the
chapter looks at how learners use english their l1 in the classroom concluding that how teachers
present activities to the class has an impact on the amount of l1 used by students during peer
interaction following up on this finding the chapter works to address questions that teachers
face in lesson planning and teaching it presents a useful list of questions teachers can ask when
designing peer interactive tasks in order to maximize the effectiveness of a wide variety of
language learning tasks
