Formulas and tables appendix about research education association. Research education association is an organization of educators scientists and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry government high schools and universities. Rea has since become a successful and highly respected publisher of study aids test preps handbooks and reference books. Rea’s test preparation series includes study guides for all academic levels in almost all disciplines. Research education association publishes test preps for students who have not yet completed high school as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in rea’s publications for college students seeking advanced degrees. Rea publishes test preps for many major graduate school admission examinations in a wide variety of disciplines including engineering law and medicine. Students at every level in every field with every ambition can find what they are looking for among rea’s publications. While most test preparation books present practice tests that bear little resemblance to the actual exams rea’s series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. Rea’s practice tests are always based upon the most recently administered exams and include every type of question that can be expected on the actual exams. Rea’s publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals instructors librarians parents and students. Our authors are as diverse as the fields represented in the books we publish they are well known in their respective disciplines and serve on the faculties of prestigious high schools colleges and universities throughout the United States and Canada. Preface this book provides an accurate and complete representation of the advanced placement examination in chemistry. Our six practice exams are based on the most
recently administered advanced placement chemistry exams each exam is three hours in length and includes every type of question that can be expected on the actual exam following each exam is an answer key complete with detailed explanations designed to clarify and contextualize the material by completing all six exams and studying the explanations which follow you can discover your strengths and weaknesses and thereby become well prepared for the actual exam the formulas and tables for the ap chemistry exam can be found at the back of this book beginning on page 417 you will be provided these formulas and tables when you take the actual exam you should also use this material when taking the practice tests in this book about the test the advanced placement chemistry examination is offered each may at participating schools and multi school centers throughout the world the advanced placement program is designed to allow high school students to pursue college level studies while attending high school the participating colleges in turn grant credit and or advanced placement to students who do well on the examinations the advanced placement chemistry course is designed to be the equivalent of a college introductory chemistry course often taken by chemistry majors in their first year of college since the test covers a broad range of topics no student is expected to answer all of the questions correctly the exam is divided into two sections 1 multiple choice composed of 75 multiple choice questions designed to test your ability to recall and understand a broad range of chemical concepts and calculations this section constitutes 45 of the final grade and you are allowed 90 minutes for this portion of the exam calculators are not permitted for this section of the exam 2 free response section composed of several comprehensive problems and essay topics this section constitutes 55 of the final grade and the student is allowed 90 minutes for this portion of the exam you may choose from the questions provided these problems and essays are designed to test your ability to think clearly and to present ideas in a logical coherent fashion you can bring an electronic hand held calculator for use on the 40 minute free response section essay and chemical reaction questions comprise the last 50 minutes of the test during which calculators are not permitted a final note about calculators most hand held models are allowed in the test center the only notable exceptions are those with typewriter style qwerty keypads if you are unsure if your calculator is permitted check with your teacher or educational testing service scoring the multiple choice section of the exam is scored by crediting each correct answer with one point and deducting only partial credit one fourth of a point for each incorrect answer omitted questions receive neither a credit nor a deduction the essay section is scored by a group of more than 1 000 college and high school educators familiar with the ap program these graders evaluate the accuracy and coherence of the essays accordingly the grades given for the essays are combined with the results of the multiple choice section and the total raw score is then converted to the program s five point scale 5 extremely well qualified 4 well qualified 3 qualified 2 possibly qualified
