Section 1983 Litigation 1997-01-01 in violence work micol seigel offers a new theorization of the quintessential incarnation of
state power the police foregrounding the interdependence of policing the state and global capital seigel redefines policing as
violence work showing how it is shaped by its role of channeling state violence she traces this dynamic by examining the formation
demise and aftermath of the u s state department s office of public safety ops which between 1962 and 1974 specialized in training
police forces internationally officially a civilian agency the ops grew and operated in military and counterinsurgency realms in
ways that transgressed the borders that are meant to contain the police within civilian public and local spheres tracing the

especially against people of color the poor and working people and how understanding police as a civilian public and local
institution legitimizes state violence while preserving the myth of state benevolence
