One of the most important yet least understood organizations in the world, the WTO, is a lynchpin of globalization allowing us to enjoy products and services from around the globe. However, it also lays bare the frailty of many industries leading some to claim that it stokes unemployment and harms the developing world. In this engaging introduction, David Collins examines the goals of the WTO and the difficulties experienced by member countries struggling to adapt to the pressures of globalization. Refuting the argument that the WTO should expand its mandate to cover wider social issues. Collins demonstrates how this would confuse the organization's primary objective to liberalize international trade with case studies straight from the headlines and clear explanations of complex issues like regional trade agreements and currency manipulation. This lucid exposition is an essential insight into what the WTO does and how it fits into the world we know.

An ideal supplemental text for any undergraduate course in humanities or introduction to the arts, this practical beginner's guide to appreciating and experiencing culture provides a handy introduction to the world of art that teaches students how to observe, enjoy, and analyze the arts. Professor Philip Bishop wrote this book because there was no concise handbook on the market covering the arts as a whole. His text provides a succinct and affordable guide to the arts and humanities geared to students who are starting from scratch in their study of the arts. Self-contained chapters provide an essential companion guide to understanding a specific discipline, including painting, sculpture, music, and theater, with a clear and insightful explanation of the discipline's process of creation. From publisher description.
