amengual investigates how labor and environmental regulations can be enforced by drawing on a study of politics in Argentina. The Oxford Handbook of North American Archaeology explores 15,000 years of indigenous human history on the North American continent, drawing on the latest archaeological theories, rich datasets, and time-honored methodologies. From the Arctic to the Mexican border and east to the Atlantic Ocean, all of the major cultural developments are covered in fifty-three chapters. Back cover: It is one of the great mysteries in the archaeology of the Americas: the depopulation of the northern Southwest in the late thirteenth century AD. Considering the numbers of people affected, the distances moved, the permanence of the departures, the severity of the surrounding conditions, and the human suffering and culture change that accompanied them, the abrupt conclusion to the farming way of life in this region is one of the greatest disruptions in recorded history. Much new paleoenvironmental data and a great deal of work have been done since the book was published.

Water adjudication lawsuits are adversarial, expensive, and lengthy. Unsettled Waters is the first detailed study of water adjudications in New Mexico. The state envisioned adjudication as a straightforward accounting of water rights as private property; however, adjudication resurfaced tensions and created conflicts among water sovereigns at multiple scales based on more than ten years of fieldwork. This book tells a fascinating story of resistance involving communal water cultures, native rights, and cleaved identities. Clashing experts and unintended outcomes whether the state can alter adjudications to meet the water demands in the twenty-first century will have serious consequences.

repair cooling and heating air conditioning fuel and exhaust emissions control ignition brakes suspension and steering electrical systems wiring diagrams with insightful essays and interviews this volume examines how artists have experimented with the medium of video across different regions of Latin America since the 1960s. The emergence of video art in Latin America is marked by multiple points of development across more than a dozen artistic centers over a period of more than twenty-five years. When first introduced during the 1960s, video was seen as empowering the portability of early equipment and the possibility of instant playback allowed artists to challenge and at times subvert the mainstream media. Video art in Latin America was and still is closely related to the desire for social change. Themes related to gender, ethnic, and racial identity as well as the consequences of social inequality and ecological disasters have been fundamental to many artists' practices. This compendium explores the history and current state of artistic experimentation with video throughout Latin America, departing from the relatively small body of existing scholarship in English, much of which focuses on individual countries. This volume approaches the topic thematically, positioning video artworks from different periods and regions throughout Latin America.

Sustainable landscaping involves a set of practices implemented by landscape practitioners to help solve environmental concerns. Continuing in the tradition of its predecessor, the second edition of Sustainable Landscaping Principles and Practices examines underlying landscaping issues that adversely affect the environment and illustrates alternative methods that result in positive outcomes. This textbook examines all phases of landscaping in both residential and commercial environments, from design to construction and implementation to maintenance, firmly anchoring landscaping practices in the context of sustainability. This book explores topics including choosing appropriate plants and using plants for specific effects such as shading, water quality and quantity, soil health, and optimal preservation techniques. Pesticide usage and its inherent dangers, energy consumption, and resource management and waste reduction, sustainable landscaping also provides a thorough grounding in pertinent issues and terminology for each topic followed by practical solutions applied by landscape professionals. Each chapter includes learning objectives and case studies of actual sustainable landscape activities, containing updated government statistics and data.

Robert F. Christy was a fascinating physicist who was one of the key players in some of the most dramatic events of the 20th century. He was one of Oppenheimer's students whom Oppenheimer hailed as one of the best in the world. He was a co-creator of the world's first nuclear reactor and the first atom bombs of which the most practical design was called the Christy gadget. Later, he became a leader in the effort to contain nuclear proliferation leading up to the Salt talks and headed a study on long-term health effects of radiation. Crucial for medical safety standards, he also made pioneering contributions in the field of astrophysics working on the variable stars Cepheids that are key distance indicators in the universe. Robert was equally fascinating as a person: he remarried at nearly 60 to an astrophysicist.
26 years younger from some 6,000 miles initial separation they had two daughters late in his life. Robert stayed active both professionally and physically into his nineties; he would still gallop on his horse at the age of 93. This biography is brought alive not only with words but also with the many treasured photographs of Robert, his family, and his colleagues.

bioarchaeological studies of children have until recently centered on population data driven topics like mortality rates and growth and morbidity patterns. This volume examines emerging issues in childhood studies looking at historic and prehistoric contexts and framing questions about the nature and quality of children’s lives. How did they develop their social identity? Were they economic actors in early civilizations? Does their health reflect the larger community? Comparing and contrasting field research from a variety of sites across Europe and the Americas, the contributors to this volume demonstrate that children not only have unique experiences but they also share cross-culturally in daily struggles. Their lives differ significantly from those of adults due to disparate social identities and variable growth needs. In some of the cases presented, this is the first time that child remains have been examined in any detail, making tracing childhood an essential resource for scholars and researchers in this growing field.

After winning an Oscar for Spirited Away, the Japanese director Hayao Miyazaki’s animated films were dubbed into many languages. Some of the films are saturated with religious themes distinctive to Japanese culture. How were these themes or what Miyazaki describes as animism received abroad, especially considering they are challenging to translate? This book examines how American and German audiences, grounded on Judeo-Christian traditions, responded to the animism in Miyazaki’s Nausicaä of the Valley of the Wind (1984), My Neighbor Totoro (1988), Princess Mononoke (1997), Spirited Away (2001), and Ponyo on the Cliff by the Sea (2008). By a close reading of adaptations and film reviews and a study of transitions in their verbal and visual approaches to animism, this book demonstrates that the American and German receptions transcended the conventional view of an antagonistic relationship between animism and Christianity. With the ability to change their shapes into forms easily accessible to other cultural arenas, the anime films make a significant contribution to interreligious dialogue.

This lively book takes Oklahoma history into the world of wild west capitalism. It begins with a useful survey of banking from the early days of the American Republic until commercial patterns coalesced in the East. It then follows the course of American expansion westward, tracing the evolution of commerce and banking in Oklahoma from their genesis to the eve of statehood in 1907. Banking in Oklahoma before statehood is not just a story of men sitting behind desks. Author Michael J. Hightower describes the riverboat trade in the Arkansas and Red River valleys and freighting on the Santa Fe Trail. Shortages of both currency and credit posed major impediments to regional commerce. Until storekeepers solved these problems by moving beyond barter to open ad hoc establishments known as merchant banks, banking went through a wild adolescence during the territorial period. The era saw robberies and insider shenanigans, rivalries between banks with territorial and national charters, speculation in land and natural resources, and land fraud in the Indian Territory. But as banking...
matured the better capitalized institutions became the nucleus of commercial culture in the Oklahoma and Indian territories to tell this story the author blends documentary historical research in both public and corporate archives with his own interviews and those that WPA field workers conducted with old timers during the New Deal bankers were never far from the action during the territorial period and the institutions they built were both cause and effect of Oklahoma's inclusion in national networks of banking and commerce the no holds barred brand of capitalism that breathed life into the Oklahoma frontier has remained alive and well since the days of the fur traders as one knowledgeable observer said in the 1980s you've always had the gambling spirit in Oklahoma
