CELF 5, Clinical Evaluation of Language Fundamentals - Fifth Edition

2020

This new edition of the book is restructured to trace the advancements made and landmarks achieved in software engineering. The text not only incorporates latest and enhanced software engineering techniques and practices but also shows how these techniques are applied into the practical software assignments. The chapters are incorporated with illustrative examples to add an analytical insight on the subject. The book is logically organised to cover expanded and revised treatment of all software process activities.

Key features:
- Large number of worked out examples and practice problems.
- Chapter end exercises and solutions to selected problems to check students' comprehension on the subject.
- Solutions manual available for instructors who are confirmed adopters of the text.
- PowerPoint slides available online at phindia.com/rajibmall to provide integrated learning to the students.
- New to the fifth edition: several rewritten sections in almost every chapter to increase readability, new topics on latest developments such as agile development using scrum, mc dc testing, quality models, etc., a large number of additional multiple choice questions and review questions in all the chapters help students to understand the important concepts.

Target audience: B Tech CS and IT, BCA, MCA, M Sc CS, MBA.
