The popularity and globalization of sport have led to an ever increasing migration of black athletes from the global south to the United States and Western Europe while the hegemonic ideology surrounding sport is that it brings diverse people together and ameliorates social divisions. Sociologists of sport have shown this to be a gross simplification instead sport and its narratives often reinforce and re create stereotypes and social boundaries especially regarding race and the prowess and the position of the black athlete because sport is a contested terrain for maintaining and challenging racial norms and boundaries the black athlete has always impacted popular white perceptions of blackness in a global manner the black migrant athlete analyzes the construction of race in Western societies through a study of the black African migrant athlete Munene Franjo. Mwaniki presents ten black African migrant athletes as a conceptual starting point to interrogate the nuances of white supremacy and of the migrant and immigrant experience with a global perspective by using celebrity athletes such as Hakeem Olajuwon Dikembe Mutombo and Catherine Ndereba as entry points into a global discourse. Mwaniki explores how these athletes are wrapped in social and cultural meanings by predominately white owned and dominated media organizations drawing from discourse analysis and cultural studies Mwaniki examines the various power relations via media texts regarding race gender sexuality class and nationality.

At a time when slavery was spreading and the country was steeped in racism two white men and two black men overcame social barriers and mistrust to form a unique alliance that sought nothing less than the end of all evil drawing on the largest extant bi racial correspondence in the civil war era John Stauffer braids together these men’s struggles to reconcile ideals of justice with the reality of slavery and oppression who could imagine that Gerrit Smith one of the richest men in the country would give away his wealth to the poor and ally himself with Frederick Douglass an ex slave and why would James McCune Smith the most educated Black man in the country link arms with John Brown a bankrupt entrepreneur along with the others distinguished by their interracial bonds they shared a millennialist vision of a new world where everyone was free and equal as the nation headed toward armed conflict these men waged their own war by establishing model interracial communities forming a new political party and embracing violence their revolutionary ethos bridged the divide between the sacred and the profane black and white masculine and feminine and civilization and savagery that had long girded Western culture in so doing it embraced a malleable and black hearted self that was capable of violent revolt against a slaveholding nation in order to usher in a kingdom of God on earth in tracing the rise and fall of their prophetic vision and alliance Stauffer reveals how radical reform helped propel the nation toward war even as it strove to vanquish slavery and preserve the peace.

living racism is based on the premise that race and racism are well entrenched elements of us society the contributors of this volume argue that race and racism are more than mere concepts instead they see and treat these as part of the fabric that constitutes and organizes everyday life consequently race and racism are maintained through structures such as social institutions e g schools criminal justice system media etc and are carried by individual actors through racial ideologies and a racial etiquette beliefs practices traditions and customs that inform how people relate to and interact with one another or not as expressed throughout this book the notion of living racism is twofold on the one hand living racism denotes the ways in which racism is embodied and active much like a living organism on the other hand living racism connects with the ways that people must navigate racism in their individual and collective lives

andre d davis takes a sobering look at the historical system of racism in america and its impact on black and brown people worldwide in his book the god defined self no matter how much black and brown people accomplish in this world they are forever seen through the eyes of those who see race as a means of classification
Brown Americans attempt to fit themselves into the mold desired by white America; they are not and will not be accepted as equals or be afforded the same opportunities as their white brothers and sisters in this country. From a layman's point of view, Davis investigates how this American form of discrimination has produced a class of people who no longer feel that racism is a key issue in our society. His intelligent appeal to politicians, clergy, corporate leaders, and the news media to use their power and influence to open the lines of communication offers a clear path to a brighter future only through this type of honest conversation will it be possible to eradicate racism both in America and abroad. Author Andre D. Davis was inspired to write this book by the God he serves and the people who endeavor to see his word manifested in all our lives. He lives with his family in Lansing, Michigan, and has several more books in the works. Publisher's website: strategicpublishinggroup.com. Title: thegoddefinedself.htm

Presenting an innovative approach to performance studies and literary history, Soyica Colbert argues for the centrality of black performance traditions to African American literature including preaching, dancing blues and gospel and theatre itself. She shows how these performance traditions create a performative ground of African American literary texts across a century of literary production. Using the physical space of the theatre and the discursive space of the page, she examines African American plays past and present including a raisin in the sun, blues for mister charlie and joe turner's come and gone. Demonstrating how African American dramatists stage black performances in their plays as acts of recuperation and restoration, creating sites that have the potential to repair the damage caused by slavery and its aftermath.

In his nearly two terms as President Barack Obama has solidified his status as something Black people haven't had for fifty years: a folk hero. The 1960s delivered Malcolm X and Martin Luther King forever twinned as larger than life outsiders and truth tellers who took on racism and died in the process. Obama is different: not an outsider but President head of the most powerful state in the world, a centrist Democrat not the face of a movement, yet he is every bit a folk hero doing battle with the beast of a system created to keep people like him on the margins. He is unique among presidents and entirely unique among Black people who never expected to have a President so soon. In *I Heart Obama*, journalist Erin Aubry Kaplan offers an unapologetic appreciation of our highest ranking first and what he means to Black Americans in the process. She explores the critiques of those in the Black community who charge that he has not done enough been present enough been Black enough to motivate real change in America. Racial antipathy cloaked as political antipathy has been the major conflict in Obama's presidency. His impossible task as an individual and as a President is nothing less than this: to reform the entire racist culture of the country he leads. Black people know he can't do it but will support his effort anyway as they have supported the efforts of many others. Obama's is a noble and singular story we will tell for generations. *I Heart Obama* looks at the story so far.

in managing inequality karen r miller examines the formulation uses and growing political importance of northern racial liberalism in detroit between the two world wars in the wake of the civil war many white northern leaders supported race neutral laws and anti discrimination statutes these positions helped amplify the distinctions they drew between their political economic system which they saw as forward thinking in its promotion of free market capitalism and the now vanquished southern system which had been built on slavery but this interest in legal race neutrality should not be mistaken for an effort to integrate northern african americans into the state or society on an equal footing with whites during the great migration which brought tens of thousands of african americans into northern cities after world war i white northern leaders faced new challenges from both white and african american activists and were pushed to manage race relations in a more formalized and proactive manner the result was northern racial liberalism the idea that all americans regardless of race should be politically equal but that the state cannot and indeed should not enforce racial equality by interfering with existing social or economic relations miller argues that racial inequality was built into the liberal state at its inception rather than produced by antagonists of liberalism managing inequality shows that our current racial system where race neutral language coincides with extreme racial inequalities that appear natural rather than political has a history that is deeply embedded in contemporary governmental systems and political economies
