project management the managerial process 6e

originally published in 1963 by r d irwin the management process presents new and traditional subject matter in a different context because it is felt that greater emphasis should be given to the interaction of the management functions all managers plan organize and control the work of others but not in a simple sequential pattern managing is a continuous operation or process involving the interaction of these functions managers must plan for organizing activity organize for it and control it and they must perform these same functions for control it is felt that practicing managers do in effect think in these terms consequently an analysis of traditional and other materials in this context should not only be more realistic but also more meaningful to the student or practitioner reference to the chapter headings in the table of contents will illustrate the way in which this interaction approach provides a basic framework for the organization of this book as a text this book is intended for a first course in management or a more advanced course depending upon the characteristics of the curriculum in which it is used no specific course preparation however need be regarded as prerequisite to its use

Sound management principles can help ensure that early childhood programs provide sound services to children and families. This document contains three training modules detailing fundamental management concepts to help Head Start staff and parents provide quality services. Module 1: What is management? Helps participants recognize how they use basic management functions in their personal lives and in interactions with Head Start staff, parents, and children. Includes activities to assess management skills. Module 2: Everyone plays a role. Links the concept of shared values with the process of teamwork and a comprehensive team approach to service delivery. Helps participants identify their roles in achieving the program's mission. Module 3: Quality is a priority. Helps participants understand the importance of quality and demonstrates how quality depends on shared head start values and on the team process. Each module includes outcomes, key concepts, and background information that support the learning outcomes. Also, each module contains an opening activity related to the preface scenario so participants can apply key concepts to head start. The modules can be used sequentially and the trainer can select and customize topics to match program needs. Various training formats are used: workshop activities, coaching activities, individualized follow-up activities, and continuing professional development activities. The final section of the guide is an annotated list of 41 print organizational and electronic resources. Author: KB.
