Characteristics of Diploma Education in Nursing 1978

This book provides a detailed study of geometrical drawing through simple and well explained worked out examples and exercises. This book is designed for students of first year engineering diploma course irrespective of their branches of study. The book is divided into seven modules. Module A covers the fundamentals of manual drafting, lettering, freehand sketching, and dimensioning of views. Module B describes two dimensional drawings like geometrical constructions, conics, miscellaneous curves, and scales. Three dimensional drawings such as projections of points, lines, plane lamina, geometrical solids, and their different sections are well explained in module C. Module D deals with the intersection of surfaces and their developments. Drawing of pictorial views is illustrated in module E which includes isometric projection, oblique projection, and perspective projections. The fundamentals of machine drawing are covered in module F. Finally, in module G, the book introduces computer aided drafting (CAD) to make the readers familiar with the state of the art techniques of drafting. Key features follow the International Standard Organization (ISO) code of practice for drawing. It includes a large number of dimensioned illustrations, worked out examples, and polytechnic questions and answers to explain the geometrical drawing process. Contains chapter end exercises to help students develop their drawing skills.

**Diploma in Art and Design Courses 1974**

Technological advancements in the present time involve innovation at all stages of research, development, diffusion, and use, and in this process of continuous advancement, demands all-round skilling of the students as well as improvements in the employability of the pass-out students. The curriculum plays an important role in the process of skilling of the students. Keeping all these under considerations, the curriculum of most of the states in the north-eastern states of India either has been revised or are in the progress. The availability of a suitable book becomes a big problem for the students and teachers as per the new revised curriculum syllabus. To help in the teaching-learning process, this book has been written. This book contains only twelve units, and each unit has been further divided into sub-units. It is hoped that the text matters given in this book will attract students and teachers and will enable the students to develop a greater interest in the science technology, especially in the field of engineering, chemistry. Any suggestion aimed to improve the content of...
the book will be highly appreciated i owe my gratefulness to all those who have supported me in writing this book i extend my thanks to the entire team of publisher for their dedication and efficient support in publishing this hand book dr rajendra prasad mizoram polytechnic lunglei
