How Real Is Race? 2013-12-11 how real is race what is biological fact what is fiction and where does culture enter what do we mean by a colorblind or postracial society or when we say that race is a social construction if race is an invention can we eliminate it this book now in its second edition employs an activity oriented approach to address these questions and engage readers in unraveling and rethinking the contradictory messages we so often hear about race the authors systematically cover the myth of race as biology and the reality of race as a cultural invention drawing on biocultural and cross cultural perspectives they then extend the discussion to hot button issues that arise in tandem with the concept of race such as educational inequalities slurs and racialized labels and interracial relationships in so doing they shed light on the intricate dynamic interplay among race culture and biology for an online supplement to how real is race second edition click here

2015-04 Yoga has come to be an icon of Indian culture and civilization and it is widely regarded as being timeless and unchanging based on extensive ethnographic research and an analysis of both ancient and modern texts. Yoga in modern India challenges this popular view by examining the history of yoga focusing on its emergence in modern India and its dramatically changing form and significance in the twentieth century. Joseph Alter argues that yoga's transformation into a popular activity idolized for its health value is based on modern ideas about science and medicine. Alter centers his analysis on an interpretation of the seminal work of Swami Kuvalayananda, one of the chief architects of the yoga renaissance in the early twentieth century. From this point of orientation, he explores current interpretations of yoga and considers how practitioners of yogic medicine and fitness combine the ideas of biology, physiology, and anatomy with those of metaphysics, transcendence, and magical power. The first serious ethnographic history of modern yoga in India, this fluently written book is must reading not only for students and scholars but also practitioners who seek a deeper understanding of how yoga developed over time into the exceedingly popular phenomenon it is today.

Indiens Fernsehen - Geplatzter Traum von nationaler Identität

2004-03-26 Every time we work on this yearbook, we are focused on making at least a small step forward to gradual elaboration of a megaevolutionary paradigm which is designed to create a united scientific field for cross disciplinary studies. The present volume is the seventh issue of the Evolution Yearbook series. Our yearbooks are designed to present to its readers the widest possible spectrum of subjects and issues from universal evolutionism to the analysis of particular evolutionary regularities in the development of biological, abiotic and social systems. Culture, cognition, language etc. The main objective of our yearbook is the creation of a unified interdisciplinary field of research within which scientists specializing in different disciplines could work within the framework of unified or similar paradigms using common terminology and searching for common rules, tendencies and regularities. Global evolution in connection with the Big History becomes the main subject of our yearbook. We strive to arrange each issue in such a way that the line from cosmic evolution to the human future is evident. The title of this issue, evolutionary aspects, stars, primates and religion, is fully justified. The volume consists of three sections: megaevolution and cosmic evolution, biosocial and social evolution, reviews and notes. This yearbook will be useful both for those who study interdisciplinary macroproblems and for specialists working in focused directions as well as for those who are interested in evolutionary issues of cosmology, biology, history, anthropology, economics, and other areas of study. More than that, this edition will challenge and excite your vision of your own life and the new discoveries going on around us.
