design publisher methods in world history is the first international volume that systematically addresses a number of methodological problems specific to the field of
world history prompted by a lack of applicable works the authors advocate a considerable sharpening of the tools used within the discipline theories constructed on
poor foundations run an obvious risk of reinforcing flawed assumptions and of propping up other more ideological constructions the dedicated critical approach outlined
in this volume helps to mitigate such risks each essay addresses a particular issue discussing its problems giving practical examples and offering solutions and ways of
overcoming the difficulties involved the perspectives are varied the criticism focussed and a common theme of coalescence is maintained throughout this unique
anthology will be of great use to advanced scholars of world history and to students entering the field for the first time this series is targeted at aqa modern world
history specification b it provides all the information students will need for paper one and paper two with exam style questions to help them prepare for the exam proper
differentiated resources in core and foundation editions mean the series can be used with all students whatever their individual ability this revision guide concentrates
on improving the students grades by summarizing key issues and highlighting practical issues concerning exam performance the new world history is a comprehensive
volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field the forty four articles in this book take stock of the history
evolving literature and current trajectories of new world history these essays together with the editorsô introductions to thematic chapters encourage educators and
students to reflect critically on the development of the field and to explore concepts approaches and insights valuable to their own work the selections are organized in
ten chapters that survey the history of the movement the seminal ideas of founding thinkers and todayôs practitioners changing concepts of world historical space and
time comparative methods environmental history the “big history” movement globalization debates over the meaning of western power and ongoing questions about the intellectual premises and assumptions that have shaped the field. A companion to world history presents over 30 essays from an international group of historians that both identify continuing areas of contention, disagreement and divergence in world and global history and point to directions for further debate. Features a diverse cast of contributors that include established world historians and emerging scholars. Explores a wide range of topics and themes including and the practice of world history, key ideas of world historians, the teaching of world history and how it has drawn upon and challenged traditional teaching approaches and global approaches to writing world history. Places an emphasis on non-anglophone approaches to the topic. Considers issues of both scholarship and pedagogy on a transnational interregional and world global scale. A vital overview of perspective on the history of the world system for all graduates and researchers in a variety of fields such as international political economy, world history, and sociology. A collection of essays by social theorists, historical sociologists, and area specialists in classical biblical and Asian studies. The contributions deal with cultural transformations in major civilizations during the axial age, the middle centuries of the last millennium BCE and their long-term consequences. This work offers a sweeping reassessment of the Jiankang empire (3rd-6th centuries CE, known as the Chinese Southern Dynasties). It shows how although one of the medieval world's largest empires, Jiankang, has been rendered politically invisible by the standard narrative of Chinese nationalist history, it proposes a new framework and terminology for writing about medieval East Asia. The book pays particular attention to the problem of ethnic identification, rejecting the idea of ethnic Chinese and delineating several other more useful ethnographic categories using case studies in agriculture, foodways, and vernacular languages. The most important, the Wuren of the Lower Yangzi region were believed to be inherently different from the peoples of the central plains. The rest of the book addresses the extent of their ethnogenesis in the medieval era. It assesses the political culture of the Jiankang empire, emphasizing military strategy, institutional cultures, and political economy, showing how it differed from central plains-based empires while having significant similarities to Southeast Asian regimes. It then explores how the Jiankang monarchs deployed three distinct repertoires of political legitimation: vernacular, Sinitic, and universalist. The Sinic repertoire was largely eclipsed in the sixth century, rendering the regime yet more similar to neighboring south seas states. The conclusion points out how the research reorients our understanding of acculturation and ethnic identification in medieval East Asia, generating new insights into the Tang Song transition period and offering new avenues of comparison with Southeast Asian and medieval European history. Migration is the talk of the town. However, the current situation is seen as resulting from unique political upheavals. Such a historical interpretation ignores the fact that migration is a fundamental phenomenon in human societies from the beginning and plays a crucial role in the cultural, economic, political, and social developments and innovations. So far, however, most studies are limited to the last four centuries and largely ignore the spectacular advances made in other disciplines which study the deep past like anthropology, archaeology, population genetics, and linguistics and that reach back as far
as 80 000 years ago this is the first book that offers an overview of the state of the art in these disciplines and shows how historians and social scientists working in the recent past can profit from their insights publisher description published in 1974 marshall hodgson s the venture of islam was a watershed moment in the study of islam by locating the history of islamic societies in a global perspective hodgson challenged the orientalist paradigms that had stunted the development of islamic studies and provided an alternative approach to world history edited by edmund burke iii and robert mankin islam and world history explores the complexity of hodgson s thought the daring of his ideas and the global context of his world historical insights into among other themes islam and world history gender in islam and the problem of muslim universality in our post 9 11 world hodgson s historical vision and moral engagement have never been more relevant a towering achievement islam and world history will prove to be the definitive statement on hodgson s relevance in the twenty first century and will introduce his influential work to a new generation of readers designed specifically for the modern world history for ocr specification 1937 this series concentrates on improving students grades by helping them understand what the key issues are how their history fits together and what they need to do with their knowledge to get the best grades in the ocr exam the book includes clear guidance on how to use historical information effectively and a time saving list of significant facts that must be learnt answers with examiners comments are included to build students confidence and help them achieve their best possible grade sample exam questions match the style of the ocr exam so that students know exactly what to expect in their exam world past to world present a sketch of global history provides an unusually brief and present focused treatment of human history beginning with the advent of agriculture and ending with considerable attention to world history developments since world war ii this accessible and concise text covers a very real but selected history of the human experience the book emphasizes the importance of contacts and exchanges among different cultures and economies up to contemporary globalization and consistent attention is devoted to comparisons among major regional societies the characteristics of agricultural and later industrial societies help establish a larger framework within the text peter n stearns works to connect past developments to contemporary global patterns and problems explicitly balancing major changes with significant continuities key features include a no frills approach to an expansive stretch of human history encourages students to understand the importance of studying history by focusing on aspects of the past that are particularly useful in assessing the current state of the world invites instructors to combine the advantages of systematic summary coverage with varied supplementary reading nine maps illustrate important movements and civilizations throughout the world truly international in coverage this book has been specifically designed as a core text for global history survey courses william h mcneill s seminal book the rise of the west a history of the human community 1963 received the national book award in 1964 and was later named one of the 100 best nonfiction books of the twentieth century by the modern library from his post at the university of chicago mcneill became one of the first contemporary north american historians to write world history seeking a broader interpretation of human affairs than prevailed in his youth this candid intellectual memoir from one of the most famous and influential historians of our era the
pursuit of truth charts the development of mcneill’s thinking and writing over seven decades at the core of his worldview is the belief that historical truth does not derive exclusively from criticizing paraphrasing and summarizing written documents nor is history merely a record of how human intentions and plans succeeded or failed instead mcneill believes that human lives are immersed in vast overarching processes of change ecological circumstances frame and limit human action while in turn humans have been able to alter their environment more and more radically as technological skill and knowledge increased mcneill believes that the human adventure on earth is unique and that it rests on an unmatched system of communication the web of human communication whether spoken written or digital has fostered both voluntary and involuntary cooperation and sustained behavioral changes permitting a single species to spread over an entire planet and to alter terrestrial flows of energy and ideas to an extraordinary degree over the course of his career as a historian teacher and mentor mcneill expounded the range of history and integrated it into an evolutionary worldview unifying physical biological and intellectual processes accordingly the pursuit of truth explores the personal and professional life of a man who affected the way a core academic discipline has been taught and understood in america the desire to acquire luxury goods and leisure services is a basic force in modern life consumerism in world history explores both the historical origins and worldwide appeal of this relatively modern phenomenon consumerism in world history draws on recent research of the consumer experience in the west and japan while also examining societies such as africa less renowned for consumerism raising new issues about change and continuity in western history and discussing specific societies in world history the book presents human societies before consumerism and how they have changed the origins of modern consumerism in western society consumerism in russia east asia africa and the islamic middle east contemporary issues and evaluations of consumerism this ground breaking study is a fascinating exploration of the world in which we live and is compulsive reading for the general reader and students alike russia in world history uses a comparative framework to understand russian history in a global context the book challenges the idea of russia as an outlier of european civilization by examining select themes in modern russian history alongside cases drawn from the british empire choi chatterjee analyzes the concepts of nation and empire selfhood and subjectivity socialism and capitalism and revolution and the world order in the 19th 20th and 21st centuries in doing so she rethinks many historical narratives that bluntly posit a liberal west against a repressive authoritarian russia instead chatterjee argues for a wider perspective which reveals that imperial practices relating to the appropriation of human and natural resources were shared across european empires both east and west incorporating the stories of famous thinkers such as leo tolstoy emma goldman wangari maathai arundhati roy among others this unique interpretation of modern russia is knitted together from the varied lives and experiences of those individuals who challenged the status quo and promoted a different way of thinking this is a ground breaking book with big and provocative ideas about the history of the modern world and will be vital reading for students of both modern russian and world history this is the first world history of empire reaching from the third millennium bce to the present by combining synthetic surveys thematic comparative essays and numerous
chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from asia to europe and from africa to the americas only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power we cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of european colonialism the history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history volume two the history of empires tracks the protean history of political domination from the very beginnings of state formation in the bronze age up to the present case studies deal with the full range of the historical experience of empire from the realms of the achaemenids and asoka to the empires of mali and songhay and from ancient rome and china to the mughals american settler colonialism and the soviet union forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases at a time when theories of evolution are undergoing renewed controversy the study of the eonic effect can break the deadlock by looking at world history in the light of evolution the assumption that evolution occurs at random is the crux of the dispute and one confused with issues of religion and secularism we can detect a non random pattern in the record of civilization itself to see evolution in action on a stupendous scale we live in the first generations with enough data to detect this phenomenon in the confusion of evolutionary theories the unexpected discovery of deep level structure can allow us to deconstruct flat history and assess claims of directionality in evolution in the process the theory of natural selection applied to human evolution is seen to fail a photo finish test the book provides a new model for the study of the overlap of history and evolution and a critique of current views of the descent of man as editor kenneth e hendrickson iii notes in his introduction since the end of the nineteenth century industrialization has become a global phenomenon after the relative completion of the advanced industrial economies of the west after 1945 patterns of rapid economic change invaded societies beyond western europe north america the commonwealth and japan in the encyclopedia of the industrial revolution in world history contributors survey the industrial revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to western society the encyclopedia of the industrial revolution in world history is a three volume work of over 1000 entries on the rise and spread of the industrial revolution across the world entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations they also cover legal developments disasters and the environmental impact of the industrial revolution each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information the encyclopedia of the industrial revolution in world history includes over 300 illustrations as well as artfully selected extended quotations

Migration History in World History 2010-01-01 world past to world present a sketch of global history provides an unusually brief and present focused treatment of
human history beginning with the advent of agriculture and ending with considerable attention to world history developments since world war ii this accessible and
concise text covers a very real but selected history of the human experience the book emphasizes the importance of contacts and exchanges among different cultures
and economies up to contemporary globalization and consistent attention is devoted to comparisons among major regional societies the characteristics of agricultural
and later industrial societies help establish a larger framework within the text peter n steams works to connect past developments to contemporary global patterns and
problems explicitly balancing major changes with significant continuities key features include a no frills approach to an expansive stretch of human history encourages
students to understand the importance of studying history by focusing on aspects of the past that are particularly useful in assessing the current state of the world
invites instructors to combine the advantages of systematic summary coverage with varied supplementary reading nine maps illustrate important movements and
civilizations throughout the world truly international in coverage this book has been specifically designed as a core text for global history survey courses

Islam and World History 2018-11-05 william h mcneill s seminal book the rise of the west a history of the human community 1963 received the national book award in
1964 and was later named one of the 100 best nonfiction books of the twentieth century by the modern library from his post at the university of chicago mcneill became
one of the first contemporary north american historians to write world history seeking a broader interpretation of human affairs than prevailed in his youth this candid
intellectual memoir from one of the most famous and influential historians of our era the pursuit of truth charts the development of mcneill s thinking and writing over
seven decades at the core of his worldview is the belief that historical truth does not derive exclusively from criticizing paraphrasing and summarizing written documents
nor is history merely a record of how human intentions and plans succeeded or failed instead mcneill believes that human lives are immersed in vast overarching
processes of change ecological circumstances frame and limit human action while in turn humans have been able to alter their environment more and more radically as technological skill and knowledge increased mcneill believes that the human adventure on earth is unique and that it rests on an unmatched system of communication the web of human communication whether spoken written or digital has fostered both voluntary and involuntary cooperation and sustained behavioral changes permitting a single species to spread over an entire planet and to alter terrestrial flows of energy and ideas to an extraordinary degree over the course of his career as a historian teacher and mentor mcneill expounded the range of history and integrated it into an evolutionary worldview uniting physical biological and intellectual processes accordingly the pursuit of truth explores the personal and professional life of a man who affected the way a core academic discipline has been taught and understood in america

Modern World History for OCR Specification 1937 2001 the desire to acquire luxury goods and leisure services is a basic force in modern life consumerism in world historyexplores both the historical origins and worldwide appeal of this relatively modern phenomenon consumerism in world historydraws on recent research of the consumer experience in the west and japan while also examining societies such as africa less renowned for consumerism raising new issues about change and continuity in western history and discussing specific societies in world history the book presents human societies before consumerism and how they have changed the origins of modern consumerism in western society consumerism in russia east asia africa and the islamic middle east contemporary issues and evaluations of consumerism this ground breaking study is a fascinating exploration of the world in which we live and is compulsive reading for the general reader and students alike

World Past to World Present 2021-09-01 russia in world history uses a comparative framework to understand russian history in a global context the book challenges the idea of russia as an outlier of european civilization by examining select themes in modern russian history alongside cases drawn from the british empire chaotier analyzes the concepts of nation and empire selfhood and subjectivity socialism and capitalism and revolution and the world order in the 19th 20th and 21st centuries in doing so she rethinks many historical narratives that bluntly posit a liberal west against a repressive authoritarian russia instead chaotier argues for a wider perspective which reveals that imperial practices relating to the appropriation of human and natural resources were shared across european empires both east and west incorporating the stories of famous thinkers such as leo tolstoy emma goldman wangari maathai arundhati roy among others this unique interpretation of modern russia is knitted together from the varied lives and experiences of those individuals who challenged the status quo and promoted a different way of thinking this is a ground breaking book with big and provocative ideas about the history of the modern world and will be vital reading for students of both modern russian and world history

The Pursuit of Truth 2005-02-01 this is the first world history of empire reaching from the third millennium bce to the present by combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents
from asia to europe and from africa to the americas only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power we cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of european colonialism the history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history volume two the history of empires tracks the protean history of political domination from the very beginnings of state formation in the bronze age up to the present case studies deal with the full range of the historical experience of empire from the realms of the achaemenids and asoka to the empires of mali and songhay and from ancient rome and china to the mughals american settler colonialism and the soviet union forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases

Consumerism in World History 2001 at a time when theories of evolution are undergoing renewed controversy the study of the eonic effect can break the deadlock by looking at world history in the light of evolution the assumption that evolution occurs at random is the crux of the dispute and one confused with issues of religion and secularism we can detect a non random pattern in the record of civilization itself to see evolution in action on a stupendous scale we live in the first generations with enough data to detect this phenomenon in the confusion of evolutionary theories the unexpected discovery of deep level structure can allow us to deconstruct flat history and assess claims of directionality in evolution in the process the theory of natural selection applied to human evolution is seen to fail a photo finish test the book provides a new model for the study of the overlap of history and evolution and a critique of current views of the descent of man

Russia in World History 2022-01-27 as editor kenneth e hendrickson iii notes in his introduction since the end of the nineteenth century industrialization has become a global phenomenon after the relative completion of the advanced industrial economies of the west after 1945 patterns of rapid economic change invaded societies beyond western europe north america the commonwealth and japan in the encyclopedia of the industrial revolution in world history contributors survey the industrial revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to western society the encyclopedia of the industrial revolution in world history is a three volume work of over 1 000 entries on the rise and spread of the industrial revolution across the world entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations they also cover legal developments disasters and the environmental impact of the industrial revolution each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information the encyclopedia of the
