this edited book is the first full length volume exclusively devoted to new research on the challenges and practices of teaching global issues it addresses the ways that schools can and do address young people’s interest and activism in contemporary global issues facing the world many young people today are passionate about issues such as climate change world poverty and human rights but have few opportunities in schools to study such issues in depth this book draws on new research to provide a deeper understanding and examples of how global issues are taught in schools the book is organized in two sections 1 contexts and policies in which global issues are taught and learned and 2 case studies of teaching and learning global issues in schools the central thesis is that global issues are an essential feature of democracy and social action in a world caught in the thrall of globalization schools can no longer afford to ignore teaching about issues impacting across the world if they intend to keep young people engaged in learning and want them to make their own communities and the greater world better places for all this book constitutes the refereed proceedings of the 7th international conference on e democracy e democracy 2017 held in athens greece in december 2017 the 18 revised full papers presented were carefully selected from 44 submissions the
papers are organized in topical sections on democracy, privacy, information dissemination and freedom of expression, social networks, electronic identity authentication, ICT in government and in the economy. Is civic identity in the United States really defined by liberal democratic political principles or is US citizenship the product of multiple traditions not only liberalism and republicanism but also white supremacy, Anglo-Saxon supremacy, Protestant supremacy, and male supremacy? In this powerful and disturbing book, Rogers Smith traces political struggles over US citizenship laws from the colonial period through the progressive era and shows that throughout this time, most adults were legally denied access to full citizenship including political rights solely because of their race, ethnicity, or gender. Basic conflicts over these denials have driven political development and civic membership in the US. Smith argues these conflicts are what truly define US civic identity. Up to this day, others have claimed that nativist, racist, and sexist traditions have been marginal or that they are purely products of capitalist institutions. In contrast, Smith’s pathbreaking account explains why these traditions have been central to American political and economic life. He shows that in the politics of nation building, principles of democracy and liberty have often failed to foster a sense of shared peoplehood and have instead led many Americans to claim that they are a chosen people, a master race, or a superior culture with distinctive gender roles. He concludes that today, the United States is in a period of reaction against the
egalitarian civic reforms of the last generation with nativist
racist and sexist beliefs regaining influence he suggests ways
that proponents of liberal democracy should alter their view of u
s citizenship in order to combat these developments more
effectively this did not start out to be a memoir rather a
compilation of professional and opinion writing to one day be
read by our children and grandchildren early in the process it
became clear that some chronology was needed to give
background and context thus a memoir plus still intended for
the extended family it is full of stories and perspectives from
two different cultures and geographies different decades and
histories this will also be of interest to a general audience who
may not read the whole book but will enjoy reading in the book
polinder writes with voice to know him will be to hear him
telling his stories honest insightful warm and funny you will
learn much about leadership relationship and partnership most
often with a smile this book examines the stakeholders of e
government and reveals the stages of growth or service
maturity levels shedding light on the paradigms and
fundamental discourses of the e government adoption process
provided by publisher consists of the 47th 48th 91st 92d annual
reports i jumped at the chance to shepherd this collection this
was personal for me in the past when i had prepared to teach
courses on political leadership i had come up with a dearth of
recent scholarly attention to the topic perhaps my perspective
on politics and leadership exacerbated the difficulty of my search
i had in mind a politics that touched all aspects of power and authority in our lives not just government encouraged the moral imagination and affirmed human agency that could make the future better than the present i searched with limited success for material that would explain how all of us shape and are shaped by politics my perspective on leadership may have also hindered my search i had in mind the simple notion of taking initiative on behalf of shared values i found too little material about leadership that extended beyond the spectacle of authority and its assumption of hierarchy i wanted to explain that each of us regardless of our place in a hierarchy has a calling to lead to act on behalf of our moral imagination editing this volume permitted me the chance to develop the material i sought i as well as other teachers no longer have a shortage of material relating politics and leadership with each other from the introduction
