This manual will help you connect with your inner soul, learn how to connect with your imagination, and most importantly, strengthen faith in yourself. Reprints of slide rule instructions for the use of collectors, educators, and students. All ephemera is currently archived in the International Slide Rule Museum library. Instruction manuals for the most part are no longer available. Slide rule production ended in the mid-1970s, and instruction manuals have deteriorated and are rapidly disappearing over time. The slide rule models themselves now considered vintage math instruments are still in abundance and in the hands of private collections, museums, and many family homes. These volumes organized by manufacturers provide instructions for the most popular models as well as some special designs. The scans from the faded and wrinkled manuals have been restored digitally in order to improve their clarity. To provide decent black printing on white pages all noise speckles, staple marks, etc., have been cleaned off the original scans to improve the reader's experience. Reprints of slide rule instructions for the use of collectors, educators, and students. All ephemera is currently archived in the International Slide Rule Museum Library. Instruction manuals for the most part are no longer available. Slide rule production ended in the mid-1970s, and instruction manuals have deteriorated and are rapidly disappearing over time. The slide rule models themselves are now considered vintage math instruments and are still in abundance and in the hands of private collections, museums, and many family homes. These volumes organized by manufacturers provide instructions for the most popular models as well as some special designs. The scans from the faded and wrinkled manuals have been restored digitally in order to improve their clarity. To provide decent black printing on white pages, all noise speckles, staple marks, etc., have been cleaned off the original scans to improve the reader’s experience.

Excerpt from New and Complete Clock and Watchmakers Manual Comprising Descriptions of the Various Gearings, Escapements and Compensations Now in Use in French, Swiss and English Clocks and Watches, Patents, Tools, etc. with Directions for Cleaning and Repairing with Numerous Engravings compiled from the French. Our plan more particularly embraces a description of the workmanship executed in Paris which is justly thought to excel that of the Swiss manufacturers. We shall enter into the details necessary to the exact description of all the manipulations employed by the most celebrated watchmakers. Show the improvements which have been introduced in the manufacture of watches, mantel and belfry clocks and chronometers and describe the various tools which have recently been invented both for abbreviating the manipulations and rendering them more exact. We shall give valuable instructions in respect to repairing and regulating clocks and watches and keeping them in order when they are thus regulated. These are very important for excellent watches are often spoiled by inexperienced workmen to whom they are entrusted for repairs or greatly injured by a want of care or knowledge on the part of their owners. We have endeavored to remedy this by giving full and minute directions as to the care and management of time pieces which cannot fail to be valuable to all who own them. We have also described the various escapements now in use together with the most important gearings and several useful tools which have lately been invented. The manual is divided into chapters in which we shall treat successively first of the manufacture of watches, second of apartment clocks and third of belfry clocks and in these we shall avoid describing any workmanship which is not approved by the best artisans.
