EBOOK: Teaching Shakespeare to Develop Children's Writing: A Practical Guide: 9-12 years 2014-10-16

Shakespeare's words belong to all of us. This book offers 87 lessons full of practical advice on how to teach Shakespeare to young children. With the knowledge that the best way to learn about the playwright is to write in the grip of his words, this exciting and accessible book Fred Sedgwick, who has been teaching Shakespeare to KS2 children for many years, offers techniques for introducing some of the plays starting with A Midsummer Night's Dream to children between the ages of nine and twelve. These ideas will help them to write, act, and draw in the grip of the greatest writers. Above all, they will help children enjoy Shakespeare's words and extend the power of their own words. Any teacher concerned with literacy, however nervous she or he may be about approaching Shakespeare, will find this book practical and inspiring.

**Teaching with the Screen 2013-01-17**

Teaching with the screen explores the forms that pedagogy takes as teachers and students engage with the screens of popular culture by necessity these forms of instruction challenge traditional notions of what constitutes education. Spotlighting the visual, spatial, and relational aspects of media-based pedagogy using a broad range of critical methodologies, textual analysis, interviews, and participant observation and placing it at the intersection of education, anthropology, and cultural studies, this book traces a path across historically specific instances of media that function as pedagogy. Hollywood films featuring teachers as protagonists, a public television course on French language and culture, a daily television news program created by high school students, and a virtual reality training simulation funded by the US Army. These case studies focus on teachers as pedagogical agents, teacher plus screen who unite the two figures that have polarized earlier debates regarding the use of media and technology in educational settings the beloved teacher and the teaching machine.

William Rimmer 1816-1879 is arguably the first modernist American sculptor although his inventive originality has not been fully acknowledged Rimmer cultivated an art of ideas and personal expression whilst supporting himself as a physician and later as a teacher of art anatomy at the Cooper Union School of Design for Women in New York unlike his contemporaries he advocated the creation of sculpture drawn entirely from the artist’s imagination as opposed to antique archetypes or live models in this way he sought to reframe excellence in American art as something that must be found within rather than derived from Europe in this new monograph the meaning of Rimmer’s works is for the first time considered from a combination of perspectives such as close
visual analysis including x-ray and infrared historical documentation and social context these are enriched with discussion of the artist's own bipolar disorder deeply held spiritualism and views on gender equality considering women just as talented as men he used naked male models in all female classes long before his contemporaries and produced an allegorical sculpture of fighting lions that criticized the tyranny of men over women this book will be of great interest to academics students art museums collectors dealers art historians and members of the public with an affinity for rimmer's work it will also appeal to those with a broader interest in american culture
