Six Theories of Child Development

1992
understanding children's development is the UK's best selling developmental psychology textbook and has been widely acclaimed for its international coverage and rigorous research-based approach. This dynamic text emphasizes the practical and applied implications of developmental research. It begins by introducing the ways in which psychologists study developmental processes before going on to consider all major aspects of development from conception through to adolescence. New to the 6th edition, increased coverage in many areas including ethics, children's rights, participatory research methods, three models of human plasticity, breastfeeding and cognitive development, fostering non-resident or absent fathers, parenting styles in China, effects of domestic violence on children, physical punishment and child maltreatment, the development and fostering of emotional intelligence, homophobic bullying and cyberbullying, and developing intercultural competence through education. There are entirely new sections on immigration, acculturation, and friendships in multicultural settings, disruptive behavior, and oppositional defiant disorder. Sexting and adolescent bedtimes. The adolescence chapter has been extensively revised covering work on the social brain insights from neuroscience, evolutionary perspectives on risk-taking and peer relationships, romantic development, and use of mobile phones and the internet.

developmental psychology from infancy to adulthood 3rd edition continues to bring together a balanced focus on
australian and international research contributions in developmental psychology students and lecturers alike will
find this text addresses the issues of lifespan development in a rigorous and challenging way using a thematic
rather than chronological approach international and national research on graduate attributes consistently
identifies critical thinking as one of the most important skills for psychology students the inclusion of critical
thinking for group discussion at the end of each chapter is designed to encourage students in the development of
this key skill these questions help students develop the ability to engage in discussions on truth and validity and
evaluate the relative importance of ideas and data students learn by doing and this is encouraged through
interactive features such as stop and review research focus boxes and practical exercises which engage them in
group discussion and challenge them to delve into complex and cross domain analysis of lifespan development
concept maps at the start of each chapter provide students with a visual snapshot of the chapter content
