the charitable sector is one of the fastest growing industries in the global economy. Nearly half of the more than 85,000 private foundations in the United States have come into being since the year 2000. Just under 5,000 more were established in 2011 alone. This deluge of philanthropy has helped create a world where billionaires wield more power over education policy, global agriculture, and global health than ever before. In no such thing as a free gift, author and academic Linsey McGoey puts this new golden age of philanthropy under the microscope, paying particular attention to the Bill and Melinda Gates Foundation. As large charitable organizations replace governments as the providers of social welfare, their largesse becomes suspect: the businesses fronting the money often create the very economic instability and inequality the foundations are purported to solve. We are entering an age when the ideals of social justice are dependent on the strained rectitude and questionable generosity of the mega-rich. English philosopher George Edward Moore (1873–1958) developed the chief modern theory of ethics, ideal utilitarianism. A Defense of Realism examines Moore's conception of philosophy and his views on the importance of metaphysics, presenting and evaluating the Principia Ethica. Author's criticisms and refutations of certain philosophical positions, especially idealism, naive realism, phenomenism, and pragmatism, are explored. Klemke gives a detailed analysis and an appraisal of Moore's defense of common sense and concentrates on Moore's realism beginning with the reality of entities in the natural universe and proofs of the external world. Finally, Klemke analyzes and enhances through personal argument Moore's views on the reality of various nonnatural entities crucial to Moore's defense of philosophical realism. Trapped by a thing called lust, Part II, Terrence is forced to deal with his pain as he continues to spin out of control. He is able to identify with the pain that he has caused others when the one person in his life that did not judge him or question his lifestyle is faced to fight for his own life. The heartache is too much for Terrence as Terrence's heart is breaking each day. He is learning to be more compassionate and in touch with not only his feelings but he is learning how to connect with the feelings of others. Includes the proceedings of the southwestern philosophical society.

most people including creativity researchers act as if they believe that creativity is not simply a useful category or label but a real thing with its own essence just as plato would argue that an ideal triangle has an essence that is shared with all actual triangles most people including creativity researchers also believe that there is a set of general creativity relevant skills that can be applied to most problems in ways that will lead to more creative outcomes creativity research now calls these beliefs into question a domain general misunderstanding of the nature of creativity relevant skills and the equally mistaken belief that creativity exists independently of actual creative things and ideas have together hindered creativity theory research assessment and training a more domain specific and nominalist understanding of creativity will free creativity researchers to make progress in areas where it is currently stymied

No Such Thing as Small Talk

many business leaders when they begin to work overseas or interact professionally with teams abroad are surprised by how much
they thought they knew about the other culture but how little it counts for on the ground the reality is that communication is multi-dimensional and simply knowing a foreign language doesn’t mean one automatically understands the culture that goes with it. Idiom, psychological factors, and cultural nuance all come into play to grasp a culture and communicate meaningfully to it. You need familiarity with language of course, but also with non-verbal communication, customs, perceived values, and concepts of time and space. Melissa Lamson, with years of experience in creating and nurturing high performing global teams, understands how it’s not enough to know the language in her book. In her book, she focuses on Germany, a major business partner for the United States, and the country in which she has lived and worked for over a decade. Business leaders today expect to face cultural differences when they do business with, for example, China or Brazil but with a Western industrialized country like Germany, one that displays a business etiquette and work ethic similar to the United States, it is easy to overlook the differences simply because so much appears on the surface to be the same. The differences are not in your face but subtle and these small yet critical differences are exactly what Melissa’s book will help you identify, respect, and bridge. Melissa succinctly presents what she calls seven keys or principles to unlocking the German business mind. Her principles, whether they relate to process, punctuality, discipline, or email communication, are insightful, personal, and compelling. Not only does she clearly lay out the differences but she also offers a cultural perspective that is rich with personal narrative. If you plan to be in any way professionally engaged with Germany, whether you wish to participate in trade fairs, carry out negotiations with partners, or colleagues discuss schedules or terms with customers or even apply for a job in Germany, the appropriate cultural understanding as this book describes will create mutual trust and will quite likely be the key to your business success.

There’s No Such Thing as a Sexual Relationship

2017-03-28

Published in 1973, *L’Étourdit* was one of the French philosopher Jacques Lacan’s most important works. The book posed questions that traversed the entire body of Lacan’s psychoanalytical explorations, including his famous idea that there is no such thing as a sexual relationship, which seeks to undermine our certainties about intimacy and reality. In *There’s No Such Thing as a Sexual Relationship*, Alain Badiou and Barbara Cassin take possession of Lacan’s short text, thinking with Lacan about his propositions and what kinds of questions they raise in relation to knowledge. Cassin considers the relationship of the real to language through a sophist lens, while the platonist Badiou unpacks philosophical claims about truth. Each of their contributions echoes back to one another, offering new ways of thinking about Lacan’s seminal ideas and his role in advancing philosophical thought.

English philosopher George Edward Moore (1873–1958) developed the chief modern theory of ethics, ideal utilitarianism. A defense of realism examines Moore's conception of philosophy and his views on the importance of metaphysics, presenting and evaluating the *principia ethica* author's criticisms and refutations of certain philosophical positions, especially idealism, naive realism, phenomenalism, and pragmatism. Klemke gives a detailed analysis and an appraisal of Moore's defense of common sense and concentrates on Moore's realism beginning with the reality of entities in the natural universe and proofs of the external world. Finally, Klemke analyzes and enhances through personal argument Moore's views on the reality of various nonnatural entities crucial to Moore's defense of philosophical realism.

Trapped by a thing called lust, part II, Terrence is forced to deal with his pain as he continues to spin out of control. He is able to identify with the pain that he has caused others when the one person in his life that did not judge him or question his life style is faced to fight for his own life. The heartache is too much for Terrence as Terrence's heart is breaking each day he is learning to be more compassionate and in touch with not only his feelings but he is learning how to connect with the feelings of others.
